Product Information

CFDA (Carboxyfluorescein diacetate)

Catalog no.	Dye	Size
51018	5-CFDA (5-Carboxyfluorescein diacetate, single isomer)	100 mg
51021	6-CFDA (6-Carboxyfluorescein diacetate, single isomer)	100 mg
51014	5-(and 6)-Carboxyfluorescein diacetate (CFDA)	100 mg

Storage and Handling

Store at -20°C desiccated and protected from light. Product is stable for up to 12 months from date of receipt when stored as recommended as a solid.

Stock solutions may be prepared in anhydrous DMSO (catalog no. 90082). Solutions can be aliquoted and stored with desiccant and protected from light at -20°C, for 12 months.

Molecular Information: C₂₆H₁₆O₉

Molecular Weight: 460

Color and Form: Off-white solid

Absorption/Emission: 492/517 nm (pH 9, after hydrolysis)

Extinction Coefficient: 78,000 (pH 9, after hydrolysis)

Figure 1. 5-(and 6)-Carboxyfluorescein diacetate (CFDA).

Product Description

Carboxyfluorescein diacetate (CFDA) is a membrane-permeant dye that fluoresces after being processed by intracellular esterases. Once processed, the carboxyfluorescein product has a pH-dependent spectral response similar to fluorescein, and requires cell membrane integrity to retain fluorescence within the cell. Therefore, CFDA can be used to monitor cell viability and intracellular pH.
