PRODUCT AND SAFETY DATA SHEET

PRODUCT NAME: DiBAC₄(3) (bis-(1,3-dibarbituric acid)-trimethine oxanol)**CATALOG #:** 61011**MOLECULAR INFORMATION:** C₂₇H₄₀N₄O₆
Mwt: 516
[70363-83-6]**PROPERTIES:**

Color & Form	Orange solid.
Purity	≥ 99% by HPLC
Solubility	Soluble in DMSO or EtOH
$\lambda_{ex} / \lambda_{em}$	493 nm / 516 nm (MeOH)
Extinction Coefficient	123,000 (MeOH)

STORAGE AND HANDLING:

Store desiccated at ≤ 4 °C and protect from light especially when in solution.

APPLICATION:

DiBAC₄(3) is a so-called translational membrane potential dye that redistributes within the cell membrane when membrane potential changes.^{1,2} The fluorescence of the dye is enhanced when the dye enters the cell membrane as a result of membrane depolarization. The rate of fluorescence response of the dye to membrane potential change is usually slower than that of the styryl dye di-4-ANEPPS, but the fluorescence signal change for the former is significantly larger than for the latter dye. A new and potentially very important application for DiBAC₄(3) is its use in high throughput drug screening.³

Ref: 1) *Chem. Phys. Lipids* **69**, 137(1994); 2) *Biochim. Biophys. Acta* **771**, 208(1984); 3) *J. Biomol. Screening* **1**(2), 75(1996).**TOXICITY:**

Unknown.

FIRST AID:

Potentially harmful. Avoid prolonged or repeated exposure. Avoid getting in eyes, on skin, or on clothing. Wash thoroughly after handling. If eye or skin contact occurs, wash affected areas with plenty of water for 15 minutes and seek medical advice. In case of inhaling or swallowing, move individual to fresh air and seek medical advice immediately.
