Product Information

Hydroxystilbamidine

Product	Catalog No.	Unit Size
Hydroxystilbamidine, methanesulfonate	80014	10 mg
Hydroxystilbamidine, 4% in H ₂ O	80023	200 uL

Storage and Handling

Store at 4°C, protected from light. Product is stable for at least 12 months from date of receipt when stored as recommended.

Molecular Information

C₁₈H₂₄N₄O₇S₂

MW: 473

CAS: 223769-64-0

Color & Form: Yellow solid (80014); Yellow liquid (80023)

Solubility: Soluble in water at 4% (solubility in PBS buffer is significantly lower)

Spectral Properties

Absorption: ~290-370 nm (broad absorption in water)

Ex/Em: When bound to membranes at pH 7.4, excitation: 350-395 nm (broad); emission: 530-600 nm (broad).

Product Description

Hydroxystilbamidine (or Fluoro-Gold™) has been used extensively as a retrograde tracer for neurons and also a histochemical stain. The dye has very broad spectra with absorption from 350-400 nm and emission from 530-620 nm. A wide band UV excitation filter is recommended for optimal excitation.

Hydroxystilbamidine, 4% solution in deionized H₂O is a convenient, ready-made solution. If desired, the solution can be diluted to a lower concentration. For most of the applications, the typical dye concentration is 2% to 4%. Note: The dye solution is produced using type I ultrapure water, but it is not prepared or packaged aseptically, and should be sterile-filtered for aseptic applications. We offer Mini-Syringe Filters and Mini-Syringe Filtration Kit with syringes and sterile vials (see Related Products), which are convenient for 0.2 um filtration of small volumes of aqueous solutions.
