PRODUCT INFORMATION

7-Aminoclonazepam-d₄

Item No. 10010670

CAS Registry No.: 1215070-96-4
Formal Name: 7-amino-5-(6-chlorophenyl-d₄)-1,3-dihydro-2H-1,4-benzodiazepin-2-one
Synonym: 7-ACLO-d₄
MF: C₁₅H₈D₄ClN₃O
FW: 289.8
Purity: ≥98%
Supplied as: A neat solid
Storage: -20°C
Stability: ≥3 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Description

7-Aminoclonazepam-d₄ (Item No. 10010670) is intended for use as an internal standard for the quantification of 7-aminoclonazepam by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

7-Aminoclonazepam is structurally categorized as a benzodiazepine. It is the primary metabolite of clonazepam (Item No. ISO60181) and is readily detected in human samples.^{1,2} This product is intended for research and forensic applications.

This product is qualified as a Reference Material that has been manufactured and tested to ISO/IEC 17025 and ISO 17034 international standards.
