PRODUCT INFORMATION

Stearic Acid

Item No. 10011298

CAS Registry No.: 57-11-4
Formal Name: octadecanoic acid
Synonyms: C18:0, Octadecanoic Acid
MF: C₁₈H₃₆O₂
FW: 284.5
Purity: ≥98%
Supplied as: A crystalline solid
Storage: -20°C
Stability: ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Stearic acid is supplied as a crystalline solid. A stock solution may be made by dissolving the stearic acid in an organic solvent purged with an inert gas. Stearic acid is soluble in organic solvents such as ethanol, DMSO, and dimethyl formamide. The solubility of stearic acid in these solvents is approximately 20, 10, and 30 mg/ml, respectively.

Description

Stearic acid is a long-chain saturated fatty acid. It is a major component of cocoa butter and has also been found in beef fat and vegetable oils.¹⁻³ Unlike many long-chain saturated fatty acids, dietary stearic acid does not induce hypercholesterolemia or raise LDL-cholesterol.⁴
