# **PRODUCT** INFORMATION

17-phenyl trinor-13,14-dihydro Prostaglandin A<sub>2</sub>

Item No. 10290

CAS Registry No:	130209-80-2	
Formal Name:	9-oxo-15R-hydroxy-17-phenyl-18,19,20-	
	trinor-prosta-5Z,10-dien-1-oic acid	
Synonym:	17-phenyl trinor-13,14-dihydro PGA <sub>2</sub>	0
MF:	C <sub>23</sub> H <sub>30</sub> O <sub>4</sub>	$\wedge$ $\sim$ $\sim$ $\sim$
FW:	370.5	( ) СООН
Purity:	≥98%	
Stability:	≥1 year at -20°C	
Supplied as:	A solution in methyl acetate	ы́н ∖—∕
UV/Vis:	λ <sub>max</sub> : 205 nm	

#### Laboratory Procedures

For long term storage, we suggest that 17-phenyl trinor-13,14-dihydro Prostaglandin A<sub>2</sub> (17-phenyl trinor-13,14-dihydro PGA<sub>2</sub>) be stored as supplied at -20°C. It should be stable for at least one year.

17-phenyl trinor-13,14-dihydro PGA<sub>2</sub> is supplied as a solution in methyl acetate. To change the solvent, simply evaporate the methyl acetate under a gentle stream of nitrogen and immediately add the solvent of choice. Solvents such as ethanol, DMSO, and dimethyl formamide purged with an inert gas can be used. The solubility of 17-phenyl trinor-13,14-dihydro  $PGA_2$  in these solvents is approximately 100 mg/ml. 17-phenyl trinor-13,14-dihydro PGA<sub>2</sub> is stable for at least six months in these solvents if stored at -20°C.

Further dilutions of the stock solution into aqueous buffers or isotonic saline should be made prior to performing biological experiments. Ensure that the residual amount of organic solvent is insignificant, since organic solvents may have physiological effects at low concentrations. If an organic solvent-free solution of 17-phenyl trinor-13,14-dihydro PGA<sub>2</sub> is needed, it can be prepared by evaporating the methyl acetate and directly dissolving the neat oil in aqueous buffers. The solubility of 17-phenyl trinor-13,14-dihydro PGA<sub>2</sub> in PBS (pH 7.2) is approximately 800 µg/ml. Store aqueous solutions of 17-phenyl trinor-13,14-dihydro PGA<sub>2</sub> on ice and use within 12 hours of preparation. Although the aqueous solutions of 17-phenyl trinor-13,14dihydro PGA<sub>2</sub> may be stable for more than 12 hours, we strongly recommend using a fresh preparation each day.

#### Description

17-phenyl trinor-13,14-dihydro PGA2 is a synthetic prostaglandin analog whose biological activity has not been widely reported. The PGF<sub>2a</sub> analog latanoprost, which bears the same lower side chain features, has been approved as a pharmaceutical for the treatment of glaucoma.<sup>1</sup>
