PRODUCT INFORMATION

Ganglioside G_{D1a} mixture (sodium salt)

Item No. 15585

CAS Registry No.: 12707-58-3

Formal Name: ganglioside G_{D1a}, disodium salt

Synonyms: Ganglioside B₁, Ganglioside G₃

MF: C₈₄H₁₄₆N₄O₃₉ • 2Na (for stearoyl)

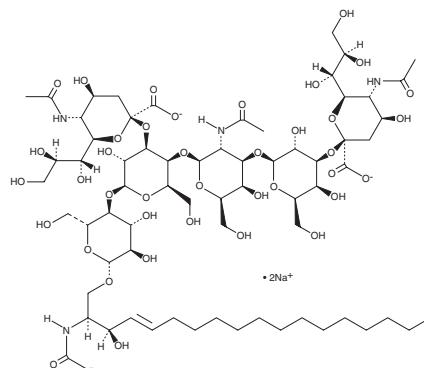

FW: 1,836.1

Purity: ≥98%

Supplied as: A lyophilized powder

Storage: -20°C

Stability: ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Ganglioside G_{D1a} mixture(sodium salt) is supplied as a lyophilized powder. A stock solution may be made by dissolving the ganglioside G_{D1a} mixture(sodium salt) in water. We do not recommend storing the aqueous solution for more than one day.

Description

Ganglioside G_{D1a} is a sialic acid-containing glycosphingolipid found in brain, erythrocytes, bone marrow, testis, spleen, and liver.¹ It can be shed from the surface of tumor cells into the microenvironment where it influences tumor-host cell interactions to promote tumor cell proliferation, invasion, and metastasis. Ganglioside G_{D1a} (20 µM) also increases endothelial cell proliferation. Furthermore, ganglioside G_{D1a} has been shown to act as a functional coreceptor for toll-like receptor 2 (TLR2), enabling the recruitment of TLR2 to lipid rafts when bound by a bacterial toxin.² Ganglioside G_{D1a} mixture contains ganglioside G_{D1a} molecular species with C18:1 and C20:1 sphingoid backbones.
