Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Description

Noscapine is an opioid alkaloid with antitussive and antimitotic properties.¹ It binds to tubulin and arrests mammalian cells in mitosis at a concentration of 20 μM.² Noscapine induces apoptosis (IC₅₀ = 25 and 10 μM in HeLa cells and thymocytes, respectively) and demonstrates antitumor activity both *in vitro* (IC₅₀ = 42.3 and 39.1 μM in MCF-7 and Renal 1983 cell lines, respectively) and in mice.²
