Description

N-Desmethylclobazam (Item No. 18564) is an analytical reference material that is structurally categorized as a benzodiazepine. It is a major active metabolite of clobazam, produced primarily by the action of cytochrome P450 isoform 3A4.¹ N-Desmethylclobazam positively modulates GABA_A receptors (EC₅₀s range from 98 to 151 μM, depending on subunit configuration).² This product is intended for research and forensic applications.

This product is qualified as a Reference Material that has been manufactured and tested to ISO/IEC 17025 and ISO 17034 international standards.
