Description

nor-W-18-d₄ (Item No. 20317) is an analytical reference standard intended for use as an internal standard for the quantification of nor-W-18 (Item No. 19713) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

nor-W-18 is structurally similar to known analgesics. It is a dealkylation metabolite of W-18 (Item Nos. 15480 | 19483).¹ This product is intended for research and forensic applications.
