PRODUCT INFORMATION

Avermectin B_{1a} Item No. 22000

CAS Registry No.: 65195-55-3
Formal Name: 5-O-demethyl-avermectin A_{1a}
Synonyms: Abamectin B_{1a}, Antibiotic C 076B_{1a}, L-676,863
MF: C₄₈H₇₂O₁₄
FW: 873.1
Purity: ≥95%
Supplied as: A solid
Storage: -20°C
Stability: ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Avermectin B_{1a} is supplied as a solid. A stock solution may be made by dissolving the avermectin B_{1a} in the solvent of choice, which should be purged with an inert gas. Avermectin B_{1a} is slightly soluble in chloroform and methanol.

Description

Avermectin B_{1a} is a macrocyclic lactone disaccharide anthelmintic agent that binds to high and low affinity sites on the mammalian GABA_A receptor.¹⁻³ Binding to the high affinity site activates the receptor to increase chloride influx, while binding to the low affinity site blocks the channel.³ Avermectin B_{1a} inhibits binding of the glycine receptor antagonist strychnine to membranes and the solubilized receptor from rat spinal cord (K_s = 1.3 and 3.6 μM, respectively).⁴ Formulations containing avermectin B_{1a} (>80%) and avermectin B_{1b} (~20%; Item No. 17453) are used in insecticides and veterinary anthelmintic formulas as abamectin (Item No. 19201).^{5,6}

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
