### Laboratory Procedures

C24 Ceramide-d<sub>7</sub> (d18:1-d<sub>7</sub>/24:0) is intended for use as an internal standard for the quantification of C24 Ceramide (Item No. 62535) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

C24 Ceramide-d<sub>7</sub> (d18:1-d<sub>7</sub>/24:0) is supplied as a crystalline solid. A stock solution may be made by dissolving the C24 Ceramide-d<sub>7</sub> (d18:1-d<sub>7</sub>/24:0) in the solvent of choice. C24 Ceramide-d<sub>7</sub> (d18:1-d<sub>7</sub>/24:0) is soluble in the organic solvent dimethyl formamide (DMF), which should be purged with an inert gas, at a concentration of approximately 0.15 mg/ml.

### Description

C24 Ceramide-d<sub>7</sub> is one of the most abundant naturally occurring ceramides.<sup>1-3</sup>
