# PRODUCT INFORMATION

## Endomorphin 1 (trifluoroacetate salt)

Item No. 23280

**Formal Name:** L-tyrosyl-L-prolyl-L-tryptophyl-L-phenylalaninamide, trifluoroacetate salt  
**Synonym:** Tyr-Pro-Trp-Phe-NH<sub>2</sub>  
**MF:** C<sub>34</sub>H<sub>38</sub>N<sub>6</sub>O<sub>5</sub> • XCF<sub>3</sub>COOH  
**FW:** 610.7  
**Purity:** ≥95%  
**Supplied as:** A lyophilized powder  
**Storage:** -20°C  
**Stability:** ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

### Laboratory Procedures

Endomorphin 1 (trifluoroacetate salt) is supplied as a lyophilized powder. A stock solution may be made by dissolving the endomorphin 1 (trifluoroacetate salt) in the solvent of choice. Endomorphin 1 (trifluoroacetate salt) is soluble in the organic solvent formic acid, which should be purged with an inert gas, at a concentration of approximately 1 mg/ml.

### Description

Endomorphin 1 is an endogenous neuropeptide and  $\mu$ -opioid receptor agonist ( $K_i = 0.36$  nM) that has analgesic, positive reinforcing, and gastrointestinal properties.<sup>1,2</sup> It is found in the brain and, to a lesser extent, in the spinal cord.<sup>3</sup> It is selective for  $\mu$ - over  $\delta$ - and  $\kappa$ -opioid receptors ( $K_{i,s} = 1,506$  and  $5,428$  nM, respectively).<sup>1</sup> Endomorphin 1 also binds to mouse brain membranes and rat recombinant  $\mu$ -opioid receptors expressed in CHO cells ( $K_{i,s} = 0.94$  and  $0.66$  nM, respectively).<sup>2</sup> It inhibits cAMP accumulation induced by forskolin in CHO cells expressing rat recombinant  $\mu$ -opioid receptors and in SH-SY5Y human neuroblastoma cells ( $IC_{50}s = 9.33$  and  $19.1$  nM, respectively).<sup>4</sup> In mice, endomorphin 1 increases analgesia in a radiant heat tail-flick assay following intracerebroventricular or intrathecal administration ( $ED_{50}s = 4.75$  and  $0.726$   $\mu$ g, respectively) and induces conditioned place preference when administered intracerebroventricularly at a dose of  $10$   $\mu$ g.<sup>2,5</sup> Endomorphin 1 ( $12$   $\mu$ g, i.c.v.) also decreases gastrointestinal transit time in mice.<sup>2</sup>

#### WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

#### SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

#### WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
