PRODUCT INFORMATION

Desogestrel

Item No. 23651

CAS Registry No.: 54024-22-5
Formal Name: (17 α)-13-ethyl-11-methylene-18,19-dinorpregn-4-en-20-yn-17-ol
Synonym: ORG 2969
MF: C₂₂H₃₀O
FW: 310.5
Purity: \geq 95%
Supplied as: A solid
Storage: -20°C
Stability: \geq 2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Desogestrel is supplied as a solid. A stock solution may be made by dissolving the desogestrel in the solvent of choice, which should be purged with an inert gas. Desogestrel is soluble in the organic solvent DMSO at a concentration of approximately 13.7 mg/ml. Desogestrel is soluble in methanol.

Description

Desogestrel is a synthetic progestogen.¹ It inhibits ovulation and prevents fertilization in rabbits and mice. Desogestrel inhibits rhodamine 123 (Item No. 16672) efflux, a measure of P-glycoprotein activity, *ex vivo* in human lymphocytes and CD8⁺ T cells in a dose-dependent manner.² Formulations containing desogestrel have been used as oral contraceptives and for the treatment of polycystic ovary syndrome.
