PRODUCT INFORMATION

Ginsenoside Rf

Item No. 23667

CAS Registry No.: 52286-58-5

Formal Name: 3 β ,12 β ,20-trihydroxydammar-24-en-6 α -yl 2-O- β -D-glucopyranosyl- β -D-glucopyranoside

MF: C₄₂H₇₂O₁₄

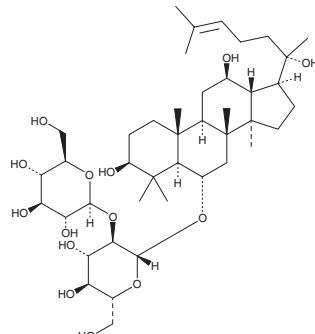

FW: 801.0

Purity: \geq 95%

Supplied as: A solid

Storage: 4°C

Stability: \geq 1 year

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Ginsenoside Rf is supplied as a solid. A stock solution may be made by dissolving the ginsenoside Rf in the solvent of choice. Ginsenoside Rf is slightly soluble methanol.

Description

Ginsenoside Rf is a steroid glycoside found in plants of the genus *Panax* that has diverse biological activities.¹⁻⁴ It inhibits production of IL-1 β , IL-6, TNF- α , NO, and reactive oxygen species (ROS) in human HT-29 intestinal epithelial cells and RAW 264.7 mouse macrophages in a dose-dependent manner.² Ginsenoside Rf inhibits N-type calcium channels in rat sensory neurons (IC_{50} = 40 μ M).¹ *In vivo*, ginsenoside Rf has antinociceptive effects in mice in the acetic acid abdominal constriction test and in the biphasic formalin test (ED_{50} s = 56 and 129 mg/kg, respectively), which are models of tonic pain.³ Topical administration of ginsenoside Rf (0.05% solution) reduces ear swelling by 34.8% in a mouse model of contact dermatitis.⁴
