PRODUCT INFORMATION

Prednicarbate

Item No. 23668

CAS Registry No.: 73771-04-7
Formal Name: (11 β)-17-[(ethoxycarbonyl)oxy]-11-hydroxy-21-(1-oxopropoxy)-pregna-1,4-diene-3,20-dione
Synonyms: Prednisolone 17-(ethyl carbonate) 21-propionate, S 77-0777
MF: C₂₇H₃₆O₈
FW: 488.6
Purity: \geq 98%
Supplied as: A solid
Storage: 4°C
Stability: \geq 1 year

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Prednicarbate is supplied as a solid. A stock solution may be made by dissolving the prednicarbate in the solvent of choice. Prednicarbate is slightly soluble in organic solvents such as chloroform, ethanol, and methanol, which should be purged with an inert gas.

Description

Prednicarbate is a synthetic corticosteroid and a derivative of prednisolone (Item No. 20866).¹ It has anti-inflammatory activity comparable to that of desoximetasone in various murine models when administered topically but lacks activity when administered subcutaneously. Topical administration of prednicarbate (2 drops of a 0.1% solution per day) induces wound healing in hairless mice.² Formulations containing prednicarbate have been used to treat chronic hand eczema.³
