PRODUCT INFORMATION

Triadimenol

Item No. 24216

CAS Registry No.: 55219-65-3

Formal Name: β -(4-chlorophenoxy)- α -(1,1-dimethylethyl)-1H-1,2,4-triazole-1-ethanol

MF: C₁₄H₁₈ClN₃O₂

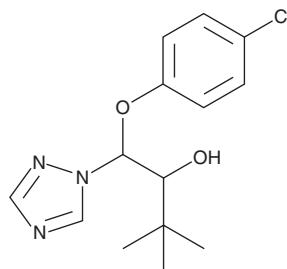

FW: 295.8

Purity: ≥95% (mixture of isomers)

Supplied as: A solid

Storage: -20°C

Stability: ≥4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Triadimenol is supplied as a solid. A stock solution may be made by dissolving the triadimenol in the solvent of choice, which should be purged with an inert gas. Triadimenol is slightly soluble in methanol and DMSO.

Description

Triadimenol is a metabolite of triadimefon (Item No. 18714), a broad-spectrum chiral triazole fungicide, that is formed by reduction of a carbonyl group to the corresponding alcohol.¹ It is teratogenic, inducing cranial nerve and ganglia abnormalities in a rat post-implantation whole embryo culture model when used at concentrations ranging from 12.5 to 125 μ M.² *In vivo*, triadimenol induces embryotoxicity in rats and rabbits when administered orally at doses of 100 and 40 mg/kg, respectively. Embryonic exposure to triadimenol (3-3,000 μ g/L) induces embryonic mortality as well as decreases fertility and increases the number of female offspring in medaka fish (*O. latipes*).³

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
