Laboratory Procedures

Centrinone is supplied as a solid. A stock solution may be made by dissolving the centrinone in the solvent of choice, which should be purged with an inert gas. Centrinone is soluble in DMSO.

Description

Centrinone is an inhibitor of polo-like kinase 4 (Plk4; K_i = 0.16 nM).¹ It is greater than 1,100- and 2,800-fold selective for Plk4 over Aurora A and Aurora B kinases, respectively, and a panel of 442 kinases at 100 nM. Centrinone (125 nM) depletes centrosomes and induces apoptosis in HeLa cells.
