# PRODUCT INFORMATION

## Dodecylphosphocholine

Item No. 25629

**CAS Registry No.:** 29557-51-5  
**Formal Name:** 2-[[[dodecyloxy]hydroxyphosphinyl]oxy]-N,N,N-trimethyl-ethanaminium, inner salt  
**Synonym:** n-Dodecylphosphocholine  
**MF:** C<sub>17</sub>H<sub>38</sub>NO<sub>4</sub>P  
**FW:** 351.5  
**Purity:** ≥95%  
**Supplied as:** A crystalline solid  
**Storage:** -20°C  
**Stability:** ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

### Laboratory Procedures

Dodecylphosphocholine is supplied as a crystalline solid. A stock solution may be made by dissolving the dodecylphosphocholine in the solvent of choice. Dodecylphosphocholine is soluble in organic solvents such as ethanol, DMSO, and dimethyl formamide (DMF), which should be purged with an inert gas. The solubility of dodecylphosphocholine in ethanol is approximately 15 mg/ml and approximately 16 mg/ml in DMSO and DMF.

Further dilutions of the stock solution into aqueous buffers or isotonic saline should be made prior to performing biological experiments. Ensure that the residual amount of organic solvent is insignificant, since organic solvents may have physiological effects at low concentrations. Organic solvent-free aqueous solutions of dodecylphosphocholine can be prepared by directly dissolving the crystalline solid in aqueous buffers. The solubility of dodecylphosphocholine in PBS, pH 7.2, is approximately 25 mg/ml. We do not recommend storing the aqueous solution for more than one day.

### Description

Dodecylphosphocholine is a detergent that is commonly used for membrane protein structure determination using NMR.<sup>1</sup> It has also been used to generate membrane mimetic micelles and to characterize pore formation by the influenza M2 transmembrane domain within a synthetic membrane.<sup>2</sup> Dodecylphosphocholine micelles induce amyloid fibril formation by the prion protein (PrP)  $\beta$ -strand (PrP (110-136)).<sup>3</sup> Dodecylphosphocholine has a critical micelle concentration (CMC) of approximately 1.5 mM.

#### WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

#### SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

#### WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
