Description

5-fluoro MDMB-PICA metabolite 7-d₅ (Item No. 27488) is an analytical reference standard intended for use as an internal standard for the quantification of 5-fluoro MDMB-PICA metabolite 7 (Item No. 22095) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated *versus* unlabeled).

5-fluoro MDMB-PICA metabolite 7 is structurally similar to known synthetic cannabinoid metabolites. This product is intended for research and forensic applications.
