PRODUCT INFORMATION

Δ^4 -Abiraterone

Item No. 27594

CAS Registry No.: 154229-21-7
Formal Name: 17-(3-pyridinyl)-androsta-4,16-dien-3-one
Synonyms: CB 7627, D4A
MF: C₂₄H₂₉NO
FW: 347.5
Purity: ≥98%
Supplied as: A solid
Storage: -20°C
Stability: ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Δ^4 -Abiraterone (D4A) is supplied as a solid. A stock solution may be made by dissolving the D4A in the solvent of choice. D4A is soluble in the organic solvent DMSO, which should be purged with an inert gas, at a concentration of approximately 10 mg/ml.

Description

D4A is an active metabolite of the CYP17A1 inhibitor abiraterone (Item No. 9002768).¹ D4A is an androgen receptor antagonist (IC₅₀ = 5.3 nM) that reduces expression of the androgen receptor target genes *PSA*, *TMPRSS2*, and *FKBP5* in LNCaP, LAPC4, and C4-2 cell lines. It inhibits the cytochrome P450 (CYP) isoform CYP17A1 by 66.5% when used at a concentration of 1 nM. D4A (10 μ M) also blocks SRD5A conversion of Δ^4 -androstenedione to 5 α -androstenedione in LAPC4 cells. *In vivo*, D4A delays tumor progression in a VCaP mouse xenograft model and increases progression-free survival in a C4-2 mouse xenograft model.

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the [complete](#) Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
