# PRODUCT INFORMATION

## Cenerimod

Item No. 29665

**CAS Registry No.:** 1262414-04-9  
**Formal Name:** (2S)-3-[4-[5-(2-cyclopentyl-6-methoxy-4-pyridinyl)-1,2,4-oxadiazol-3-yl]-2-ethyl-6-methylphenoxy]-1,2-propanediol

**MF:** C<sub>25</sub>H<sub>31</sub>N<sub>3</sub>O<sub>5</sub>  
**FW:** 453.5  
**Purity:** ≥95%  
**UV/Vis.:** λ<sub>max</sub>: 249 nm  
**Supplied as:** A crystalline solid  
**Storage:** -20°C  
**Stability:** ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

### Laboratory Procedures

Cenerimod is supplied as a crystalline solid. A stock solution may be made by dissolving the cenerimod in the solvent of choice, which should be purged with an inert gas. Cenerimod is soluble in organic solvents such as ethanol, DMSO, and dimethyl formamide (DMF). The solubility of cenerimod in these solvents is approximately 10, 20, and 25 mg/ml, respectively.

Cenerimod is sparingly soluble in aqueous buffers. For maximum solubility in aqueous buffers, cenerimod should first be dissolved in DMF and then diluted with the aqueous buffer of choice. Cenerimod has a solubility of approximately 0.3 mg/ml in a 1:2 solution of DMF:PBS (pH 7.2) using this method. We do not recommend storing the aqueous solution for more than one day.

### Description

Cenerimod is a sphingosine-1-phosphate receptor 1 (S1P<sub>1</sub>) modulator with an EC<sub>50</sub> value of 1 nM in a [<sup>35</sup>S]GTPγS binding assay.<sup>1</sup> It is selective for S1P<sub>1</sub> over S1P<sub>2</sub>, -3, -4, and -5 (EC<sub>50</sub>s = >10,000, 228, 2,137, and 36 nM, respectively). Cenerimod (5 μM) decreases TGF-β-induced increases in collagen levels in primary mouse skin fibroblasts.<sup>2</sup> It inhibits CD4<sup>+</sup> T cell, CD8<sup>+</sup> T cell, and CD11b<sup>+</sup> cell infiltration, reduces *Il1b*, *Il6*, and *Il13* expression, as well as decreases fibrosis in the skin of a mouse model of sclerodermatous chronic graft versus host disease induced by allogeneic bone marrow transplant when administered at a dose of 10 mg/kg per day. Cenerimod (6 mg/kg per day for 32 days) reduces paralysis and spinal cord demyelination in a mouse model of experimental autoimmune encephalitis (EAE).

#### WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

#### SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

#### WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
