PRODUCT INFORMATION

Thioredoxin Reductase 1 Inhibitor 1

Item No. 31307

CAS Registry No.: 246020-68-8
Formal Name: 2-[(4-chlorophenyl)sulfonyl]-6-methoxy-3-nitro-pyridine
Synonyms: TRi-1, TxnR1 Inhibitor 1, Txnrd1 Inhibitor 1
MF: C₁₂H₉ClN₂O₅S
FW: 328.7
Purity: ≥98%
Supplied as: A solid
Storage: -20°C
Stability: ≥4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Thioredoxin reductase 1 inhibitor 1 (TRi-1) is supplied as a solid. A stock solution may be made by dissolving the TRi-1 in the solvent of choice, which should be purged with an inert gas. TRi-1 is soluble in DMSO.

Description

TRi-1 is an irreversible inhibitor of thioredoxin reductase 1 (TrxR1; IC₅₀ = 0.012 μM).¹ It inhibits TrxR1-induced reduction of Trx1 in a cell-free assay (IC₅₀ = 4.3 μM). TRi-1 (10 μM) reduces the mitochondrial oxygen consumption rate in HCT116 colorectal cancer cells. It increases the intracellular levels of hydrogen peroxide in FaDu head and neck squamous cell carcinoma (HNSCC) cells in a time- and concentration-dependent manner. TRi-1 decreases the viability of FaDu cells (IC₅₀ = 0.72 μM). *In vivo*, TRi-1 (10 mg/kg twice per day) decreases tumor growth in a FaDu HNSCC mouse xenograft model. It induces intratumoral apoptosis in a FaDu HNSCC mouse xenograft model when administered at a dose of 5 mg/kg daily. TRi-7 also is toxic to *S. mansoni* adult worms (LD₅₀ = 10.07 μM).²
