PRODUCT INFORMATION

(±)-6-Prenylaringenin

Item No. 34499

CAS Registry No.: 68682-01-9
Formal Name: 2,3-dihydro-5,7-dihydroxy-2-(4-hydroxyphenyl)-6-(3-methyl-2-buten-1-yl)-4H-1-benzopyran-4-one
Synonym: (±)-6-PN
MF: C₂₀H₂₀O₅
FW: 340.4
Purity: ≥95%
Supplied as: A solid
Storage: -20°C
Stability: ≥2 years
Item Origin: Synthetic

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

(±)-6-Prenylaringenin ((±)-6-PN) is supplied as a solid. A stock solution may be made by dissolving the (±)-6-PN in the solvent of choice, which should be purged with an inert gas. (±)-6-PN is soluble in methanol.

Description

(±)-6-PN is a flavonoid that has been found in the hop plant, *H. lupulus*, and has diverse biological activities.^{1,2} It inhibits the T-type voltage-gated calcium (Ca_v) channel Ca_v3.2 and high-voltage-activated calcium currents in whole-cell patch-clamp assays using HEK293 cells (IC₅₀s = 0.912 and 4.765 μM, respectively).¹ It inhibits proliferation of PC3 and DU145 prostate cancer cells (IC₅₀s = 18.4 and 29.1 μM, respectively).² (±)-6-PN (20 and 30 mg/kg) reduces mechanical allodynia in a mouse model of neuropathic pain induced by partial sciatic nerve ligation.¹

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
