PRODUCT INFORMATION

Arecaidine propargyl ester (hydrobromide)

Item No. 34568

CAS Registry No.: 116511-28-5
Formal Name: 1,2,5,6-tetrahydro-1-methyl-3-pyridinecarboxylic acid, 2-propyn-1-yl ester, monohydrobromide
Synonym: APE
MF: C₁₀H₁₃NO₂ • HBr
FW: 260.1
Purity: ≥95%
Supplied as: A solid
Storage: -20°C
Stability: ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Arecaidine propargyl ester (hydrobromide) is supplied as a solid. A stock solution may be made by dissolving the arecaidine propargyl ester (hydrobromide) in the solvent of choice, which should be purged with an inert gas. Arecaidine propargyl ester (hydrobromide) is soluble in organic solvents such as DMSO and dimethyl formamide. The solubility of arecaidine propargyl ester (hydrobromide) in these solvents is approximately 30 mg/ml.

Further dilutions of the stock solution into aqueous buffers or isotonic saline should be made prior to performing biological experiments. Ensure that the residual amount of organic solvent is insignificant, since organic solvents may have physiological effects at low concentrations. Organic solvent-free aqueous solutions of arecaidine propargyl ester (hydrobromide) can be prepared by directly dissolving the solid in aqueous buffers. The solubility of arecaidine propargyl ester (hydrobromide) in PBS (pH 7.2) is approximately 10 mg/ml. We do not recommend storing the aqueous solution for more than one day.

Description

Arecaidine propargyl ester is an agonist of M₂ muscarinic acetylcholine receptors (mAChRs).¹ It selectively binds to M₂ over M₁, M₃, M₄, and M₅ mAChRs in CHO cells expressing the human receptors (K_s = 0.0871, 1.23, 0.851, 0.977, and 0.933 μM, respectively). Arecaidine propargyl ester induces contractions in isolated guinea pig atrium (pD₂ = 8.67). It induces apoptosis and the production of reactive oxygen species (ROS) in U87 and U251 glioblastoma cells when used at a concentration of 100 μM.² Arecaidine propargyl ester decreases mean arterial blood pressure in normotensive cats (ED₂₅ = 1.9 nmol/kg).³ It is toxic to house flies (*Musca*) when administered at a dose of 75 μg/fly.⁴

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
