### Laboratory Procedures

Albendazole sulfone-d<sub>3</sub> is intended for use as an internal standard for the quantification of albendazole sulfone (Item No. 35445) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

Albendazole sulfone-d<sub>3</sub> is supplied as a solid. A stock solution may be made by dissolving the albendazole sulfone-d<sub>3</sub> in the solvent of choice, which should be purged with an inert gas. Albendazole sulfone-d<sub>3</sub> is soluble in the organic solvent dimethyl formamide at a concentration of approximately 1 mg/ml. It is also slightly soluble in DMSO.

### Description

Albendazole sulfone is an active metabolite of the benzimidazole anthelmintic albendazole (Item No. 23705).<sup>1,2</sup> It inhibits spore formation of *E. hellem*, *E. cuniculi*, and *E. intestinalis* *in vitro* (IC<sub>90</sub>S = <0.0001, <0.001, and <0.1 µg/ml, respectively).<sup>2</sup>
