# PRODUCT INFORMATION

## 1-Methylpseudouridine

Item No. 35401

**CAS Registry No.:** 13860-38-3  
**Formal Name:** 1-methyl-5-β-D-ribofuranosyl-2,4(1H,3H)-pyrimidinedione  
**Synonyms:** m1ψ, N<sup>1</sup>-methyl-ψ, N<sup>1</sup>-Methylpseudouridine, NSC 240023, U-50228  
**MF:** C<sub>10</sub>H<sub>14</sub>N<sub>2</sub>O<sub>6</sub>  
**FW:** 258.2  
**Purity:** ≥98%  
**UV/Vis.:** λ<sub>max</sub>: 211, 271 nm  
**Supplied as:** A solid  
**Storage:** -20°C  
**Stability:** ≥4 years  
**Item Origin:** Synthetic

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

### Laboratory Procedures

1-Methylpseudouridine is supplied as a solid. A stock solution may be made by dissolving the 1-methylpseudouridine in the solvent of choice, which should be purged with an inert gas. 1-Methylpseudouridine is soluble in organic solvents such as DMSO and dimethyl formamide. The solubility of 1-methylpseudouridine in these solvents is approximately 10 and 3 mg/ml.

Further dilutions of the stock solution into aqueous buffers or isotonic saline should be made prior to performing biological experiments. Ensure that the residual amount of organic solvent is insignificant, since organic solvents may have physiological effects at low concentrations. Organic solvent-free aqueous solutions of 1-methylpseudouridine can be prepared by directly dissolving the solid in aqueous buffers. The solubility of 1-methylpseudouridine in PBS (pH 7.2) is approximately 5 mg/ml. We do not recommend storing the aqueous solution for more than one day.

### Description

1-Methylpseudouridine is a nucleoside analog that has been found in *Streptomyces platensis*.<sup>1</sup> It increases the thermodynamic and biological stability of RNA.<sup>2-4</sup> Unlike unmodified mRNA, 1-methylpseudouridine-containing mRNA does not induce IFN-β secretion in A549 cells, indicating low immunogenicity.<sup>3</sup> Intramuscular or intradermal administration of luciferase mRNA containing 1-methylpseudouridine *via* lipid complexes increases luciferase activity in mice. Formulations containing 1-methylpseudouridine incorporated into mRNA have been used in the development of mRNA-based vaccines.

#### WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

#### SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

#### WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
