### Laboratory Procedures

Kisspeptin-234 (trifluoroacetate salt) is supplied as a solid. A stock solution may be made by dissolving the kisspeptin-234 (trifluoroacetate salt) in the solvent of choice, which should be purged with an inert gas. Kisspeptin-234 (trifluoroacetate salt) is slightly soluble in DMSO and dimethyl formamide.

### Description

Kisspeptin-234 is a peptide antagonist of the kisspeptin receptor, previously known as G protein-coupled receptor 54 (GPR54).<sup>1</sup> It inhibits kisspeptin-10-induced inositol phosphate production in CHO cells expressing the human kisspeptin receptor (IC<sub>50</sub> = 7 nM) and kisspeptin-10-induced firing of isolated mouse gonadotropin-releasing hormone (GnRH) neurons. *In vivo*, kisspeptin-234 inhibits pulsatile GnRH secretion in pubertal female rhesus monkeys. It also inhibits kisspeptin-10-induced luteinizing hormone secretion in adult male rats and mice.
