PRODUCT INFORMATION

Edonepic (maleate)

Item No. 36026

CAS Registry No.: 519187-97-4
Formal Name: 1-[3-(2-benzo[b]thien-5-ylethoxy)propyl]-3-azetidinol, 2Z-butenedioate
Synonym: T-187MA
MF: C₁₆H₂₁NO₂S • C₄H₄O₄
FW: 407.5
Purity: ≥98%
UV/Vis.: λ_{max}: 229 nm
Supplied as: A solid
Storage: -20°C
Stability: ≥4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Edonepic (maleate) is supplied as a solid. A stock solution may be made by dissolving the edonepic (maleate) in the solvent of choice, which should be purged with an inert gas. Edonepic (maleate) is soluble in DMSO.

Description

Edonepic is a neurotrophic agent.¹ It protects against sodium nitroprusside-induced mitochondrial dysfunction and apoptosis in primary rat cortical neurons when used at concentrations of 0.1 and 1 μM. Edonepic (8.4 mg/kg per day, p.o.) prevents granule cell loss induced by amyloid-β (1-40) (Aβ40) and improves performance in the distance movement, random reward place search, and place learning tasks in rats.² It also increases hippocampal neurogenesis and ameliorates Aβ40-induced spatial learning impairments in a rat model of Alzheimer's disease.³

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
