# PRODUCT INFORMATION

## 10-oxo-12(Z)-Octadecenoic Acid-d<sub>5</sub> Item No. 36986

<b>Formal Name:</b>	(Z)-10-oxooctadec-12-enoic-17,17,18,18,18-d <sub>5</sub> acid
<b>Synonyms:</b>	10-keto-12Z-Octadecenoic Acid-d <sub>5</sub> , 10-oxo-12-cis-Octadecenoic Acid-d <sub>5</sub>
<b>MF:</b>	C <sub>18</sub> H <sub>27</sub> D <sub>5</sub> O <sub>3</sub>
<b>FW:</b>	301.5
<b>Chemical Purity:</b>	≥95% (10-oxo-12(Z)-Octadecenoic Acid)
<b>Deuterium Incorporation:</b>	≥99% deuterated forms (d <sub>1</sub> -d <sub>5</sub> ); ≤1% d <sub>0</sub>
<b>Supplied as:</b>	A solution in ethanol
<b>Storage:</b>	-20°C
<b>Stability:</b>	≥1 year

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

### Laboratory Procedures

10-oxo-12(Z)-Octadecenoic acid-d<sub>5</sub> is intended for use as an internal standard for the quantification of 10-oxo-12(Z)-octadecenoic acid (Item No. 36977) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

### Description

10-oxo-12(Z)-Octadecenoic acid is a metabolite of linoleic acid (Item Nos. 90150 | 90150.1 | 21909) and an activator of transient receptor potential vanilloid 1 (TRPV1).<sup>1,2</sup> It is formed from linoleic acid by conjugated linoleic acid dehydrogenase (CLA-DH) via a 10-hydroxy-12(Z)-octadecenoic acid intermediate and can also be produced from linoleic acid by gut microbiota.<sup>1</sup> 10-oxo-12(Z)-Octadecenoic acid (100 μM) selectively increases calcium levels in HEK293 cells expressing TRPV1 over those expressing TRPV2, TRPV3, TRPV4, and TRP melastatin 8 (TRPM8).<sup>2</sup> It also induces inward currents in HEK293 cells expressing TRPV1, an effect that can be blocked by the TRPV1 antagonist capsazepine (Item No. 10007518). Dietary administration of 10-oxo-12(Z)-octadecenoic acid (0.1% w/w) reduces weight gain and adipose tissue weight and increases the expression of the gene encoding mitochondrial uncoupling protein 1 (Ucp1) in wild-type, but not *Trpv1* knockout, mice fed a high-fat diet. It also decreases plasma glucose and triglyceride levels in diabetic KKAy mice fed a high-fat diet.
