Laboratory Procedures

Cys-pexiganan (trifluoroacetate salt) is supplied as a solid. A stock solution may be made by dissolving the cys-pexiganan (trifluoroacetate salt) in water. We do not recommend storing the aqueous solution for more than one day.

Description

Cys-pexiganan is an antimicrobial peptide and a derivative of pexiganan (Item No. 36924) with an N-terminal cysteine.¹ It is active against *P. aeruginosa* and *S. aureus* (MICs = 64 and 16 µg/ml, respectively). Conjugation of Cys-pexiganan to cellulose acetate-containing polyvinyl alcohol electrospun mats accelerates clotting of isolated recalcified human plasma.
