Laboratory Procedures

S1H (trifluoroacetate salt) is supplied as a solid. A stock solution may be made by dissolving the S1H (trifluoroacetate salt) in water. We do not recommend storing the aqueous solution for more than one day.

Description

S1H is a synthetic peptide mimetic of human growth hormone amino acids 36-51 and an antagonist of the growth hormone receptor.¹ It adopts an α -helical structure in solution and decreases STAT5 phosphorylation induced by human growth hormone in SK-MEL-28 and MALME-3M melanoma cell lines, as well as by prolactin in IM-9 B cell lymphocytes, when used at concentrations of 100 and 200 nM.
