## Laboratory Procedures

JNJ-10229570 is supplied as a solid. A stock solution may be made by dissolving the JNJ-10229570 in the solvent of choice, which should be purged with an inert gas. JNJ-10229570 is soluble in the organic solvent DMSO.

## Description

JNJ-10229570 is an antagonist of melanocortin receptor 1 (MC1R), MC4R, and MC5R (IC<sub>50</sub>s = 270, 240, and 200 nM, respectively, in radioligand binding assays).<sup>1</sup> It prevents bovine pituitary extract-induced increases in lipid droplets in primary human sebocytes when used at a concentration of 0.05 μM. JNJ-10229570 (1 μM) inhibits cholera toxin-induced increases in squalene and cholesterol esters, but not triglycerides, in primary human sebocytes. Topical application of JNJ-10229570 (0.05%) inhibits sebum secretion from, and sebaceous gland differentiation in, transplanted human skin in a mouse xenograft model.
