# PRODUCT INFORMATION

## MD2-IN-1

Item No. 38323

**CAS Registry No.:** 111797-22-9  
**Formal Name:** 1-(3,4-dimethoxyphenyl)-3-(3,4,5-trimethoxyphenyl)-2-propen-1-one  
**Synonym:** Myeloid Differentiation 2 Inhibitor 1  
**MF:** C<sub>20</sub>H<sub>22</sub>O<sub>6</sub>  
**FW:** 358.4  
**Purity:** ≥98%  
**Supplied as:** A solid  
**Storage:** -20°C  
**Stability:** ≥4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

### Laboratory Procedures

MD2-IN-1 is supplied as a solid. A stock solution may be made by dissolving the MD2-IN-1 in the solvent of choice, which should be purged with an inert gas. MD2-IN-1 is soluble in the organic solvent DMSO.

### Description

MD2-IN-1 is a chalcone derivative and an inhibitor of the interaction between myeloid differentiation 2 (MD-2) and LPS.<sup>1</sup> It inhibits the interaction between MD-2 and LPS in a cell-free assay when used at a concentration of 0.1 μM. It inhibits LPS-induced increases in the levels of TNF-α and IL-6 secreted from isolated and washed mouse peritoneal macrophages (MPMs; IC<sub>50</sub>s = 4.27 and 2.09 μM, respectively). MD2-IN-1 (5 and 20 μM) inhibits LPS-induced Nf-κB DNA binding in MPMs. It inhibits the growth of HepG2 hepatocellular, A549 lung, HT-29 colon, HeLa cervical, MDA-MB-231 breast, and A2780 ovarian cancer cells (GI<sub>50</sub>s = 0.19, 0.16, 0.062, 0.019, 0.065, and 0.32 μM, respectively).<sup>2</sup> MD2-IN-1 (10 mg/kg) reduces tumor volume and weight in a HeLa mouse xenograft model. *In vivo*, MD2-IN-1 (20 mg/kg per day) prevents LPS-induced increases in bronchoalveolar lavage fluid (BALF) total protein levels and CD68<sup>+</sup> macrophage and neutrophil infiltration in a mouse model of LPS-induced acute lung injury.<sup>1</sup> It also reduces myeloperoxidase (MPO) activity in isolated neutrophils in the same model.
