Laboratory Procedures

Hydroxy ipronidazole-d₃ is intended for use as an internal standard for the quantification of hydroxy ipronidazole by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

Hydroxy ipronidazole-d₃ is supplied as a solid. A stock solution may be made by dissolving the hydroxy ipronidazole-d₃ in the solvent of choice, which should be purged with an inert gas. Hydroxy ipronidazole-d₃ is slightly soluble in chloroform and methanol.

Description

Hydroxy ipronidazole is a metabolite of the nitroimidazole antiprotozoal agent ipronidazole (Item No. 35082).¹
