KIT INSTRUCTIONS

Item No. 39211

GENERAL GUIDELINES:

- Do not mix NaveniBright reagents with other Naveni[™] product lines.
- Reaction volume depends on the sample size.
- Use best practices when pipetting to minimize reagent consumption.
- Centrifuge vials before pipetting.
- Thoroughly defrost all buffer mixtures at room temperature, vortex well and spin down before use.
- Vortex and spin down all enzymes (1 and 2) before use.

Naveni pY PD1, AP

- Keep enzymes on ice or a frozen cold block.
- Wait to add enzymes until immediately before adding to the sample.
- Remove excess washing buffer from samples before adding reagent.
- Do not allow slides/samples to dry.
- Preheat the humidity chamber before each step.
- Incubation times or temperatures other than those specified may give erroneous results.
- As with any product derived from biological sources, proper handling procedures should be used.
- Wear appropriate Personal Protective Equipment to avoid contact with eyes and skin.
- Chromogens may be carcinogenic and should be handled with care.
- Unused solutions should be disposed of according to local regulations.

REQUIRED BUT NOT SUPPLIED

- VectaMount[®] Express Mounting Medium (H-5700-60) from Vector Laboratories.
- Isopropanol 99,5 %.
- Endogenous alkaline phosphatase quenching solution.
- TBS and TBS-T Tris-buffered saline and Tris-buffered saline supplemented with 0,05% Tween, respectively.

IMPORTANT:

Appropriate precautions should be taken to avoid antibody cross-contamination. Crosscontamination is the primary source of unspecific background due to the high sensitivity of the assay.

Avoid bulk washing methods when multiple antibodies are used. Wash any technical controls separately.

KIT COMPONENTS:

Box 1.1:

Material	Article Number	Amount	Storage*
NaveniBright Blocking Buffer (1x)	NB.1.100.01	4000 μl	
NaveniBright Supplement 1	NB.1.100.03	500 μl	+4 to +8°C
NaveniBright Antibody Diluent (1x)	NB.1.100.02	8000 μl	
NaveniBright Supplement 2	NB.1.100.04	1000 µl	DO NOT
Probe Diluent (1x)	NF.1.100.03	4000 μl	FREEZE
NaveniBright Probe Anti-M (40x)	NB.1.100.06	100 µl	
NaveniBright Probe Anti-R (40x)	NB.1.100.07	100 µl	

Box 1.2:

Material	Article Number	Amount	Storage*
NaveniBright AP/HRP diluent	NB.1.100.08	8000 μl	
NaveniBright AP Reagent	NB.1.100.10	100 µl	+4 to +8°C
NaveniBright AP Substrate Diluent	NB.1.100.09	8000 μl	DO NOT
NaveniBright AP Substrate 1	NB.1.100.11	140 µl	FREEZE
NaveniBright AP Substrate 2	NB.1.100.12	100 µl	

Bag 1.3:

Material	Article Number	Amount	Storage*
Nuclear Stain	NB.1.100.16	6000 μl	+4 to +8°C DO NOT FREEZE

Box 2:

Material	Article Number	Amount	Storage*
Navenibody PD1 (200x)	PD1.2.01	20 µl	
Navenibody pTyr M (200x)	PD1.2.02	20 µl	
NaveniBright Buffer 1 (5x)	NB.2.100.17	800 µl	at -25 to -15°C
NaveniBright Enzyme 1 (40x)	NF.2.100.11	100 µl	-25 t0 -15 C
NaveniBright Buffer 2 (5x)	NB.2.100.18	800 µl	
NaveniBright Enzyme 2 (40x)	NF.2.100.15	100 µl	

* When stored as directed, the product is stable at least for 3 months after receipt
