### Laboratory Procedures

Myomodulin A (*Aplysia*, *Lymnaea*) (trifluoroacetate salt) is supplied as a solid. A stock solution may be made by dissolving the myomodulin A (*Aplysia*, *Lymnaea*) (trifluoroacetate salt) in water. We do not recommend storing the aqueous solution for more than one day.

### Description

Myomodulin A is a gastropod neuropeptide.<sup>1</sup> It is found in gastropod ventral lobe neurons, neural elements of the accessory radula closer (ARC) muscle, and penis nerve.<sup>1-3</sup> Myomodulin A is biosynthesized by ARC motor neurons in *A. californica* and potentiates motor neuron-elicited contractions of the *A. californica* buccal mass ARC.<sup>2</sup> Myomodulin A also increases the relaxation rate of electrically evoked muscle contractions in *L. stagnalis* penis retractor muscle.<sup>3</sup>
