PRODUCT INFORMATION

BAY-4931

Item No. 40668

CAS Registry No.: 423150-91-8
Formal Name: 2-chloro-N-[2-(4-ethylphenyl)-5-benzoxazolyl]-5-nitro-benzamide
MF: C₂₂H₁₆ClN₃O₄
FW: 421.8
Purity: ≥98%
Supplied as: A solid
Storage: -20°C
Stability: ≥4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

BAY-4931 is supplied as a solid. A stock solution may be made by dissolving the BAY-4931 in the solvent of choice, which should be purged with an inert gas. BAY-4931 is soluble (≥10 mg/ml) in DMSO.

Description

BAY-4931 is a PPAR γ inverse agonist.¹ It acts as an inverse agonist in a co-repressor reporter assay with a peptide from nuclear receptor co-repressor 2 (NCOR2; EC₅₀ = 5.8 nM). BAY-4931 is selective for PPAR γ in reporter assays using CHO cells (IC₅₀s = 0.14 and 0.4 nM for the mouse and human receptors, respectively) over PPAR α and PPAR δ in reporter assays using CHO cells (IC₅₀s = >50 μ M for both human receptors). BAY-4931 inhibits the proliferation of UM-UC-9 human bladder cancer cells that endogenously contain a focal amplification of PPAR γ , the gene encoding PPAR γ (IC₅₀ = 3.4 nM).

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the [complete](#) Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
