Description

H1L1A1B3 is an ionizable cationic lipid that has been used in combination with other lipids in the formation of lipid nanoparticles (LNPs) for the delivery of circular RNA (circRNA) *in vitro* and *in vivo*.¹ LNPs containing H1L1A1B3 and encapsulating circRNA encoding IL-12 induce IL-12 production four times more effectively than LNPs containing ALC-0315 (Item No. 34337) and encapsulating the same circRNA in LLC1 murine Lewis lung carcinoma cells. Administration of LNPs containing H1L1A1B3 and encapsulating circRNA encoding IL-12 reduces tumor growth in an LLC1 murine Lewis lung carcinoma model in combination with an antibody against programmed cell death ligand 1 (PD-L1).
