Laboratory Procedures

Undecylenoyl phenylalanine is supplied as a solid. A stock solution may be made by dissolving the undecylenoyl phenylalanine in the solvent of choice, which should be purged with an inert gas. Undecylenoyl phenylalanine is soluble (≥ 10 mg/ml) in DMSO and sparingly soluble (1-10 mg/ml) in ethanol.

Description

Undecylenoyl phenylalanine is a lipoamino acid.¹ Liposomes containing undecylenoyl phenylalanine increase skin penetration and retention of undecylenoyl phenylalanine, as well as reduce melanin levels, in minipig skin. Formulations containing undecylenoyl phenylalanine have been used in skin-brightening cosmetics.
