PRODUCT INFORMATION

JAK2 JH1 and JH2 Domains (human, recombinant; aa 532-1,132)

Item No. 42272

Overview and Properties

Synonyms: Janus-associated Kinase 2, JTK10, Tyrosine-protein Kinase JAK2
Source: Active recombinant human N-terminal His- and GST-tagged JAK2 JH1 and JH2 domains expressed in insect cells (sf9)
Amino Acids: 532-1,132
Uniprot No.: O60674
Molecular Weight: 98 kDa
Storage: -80°C (as supplied)
Stability: ≥6 months
Purity: ≥80% estimated by SDS-PAGE
Supplied in: 45 mM Tris-HCl, pH 8.0, with 300 mM sodium chloride, 2.4 mM potassium chloride, 0.04% polysorbate 20, 3 mM DTT, 10% glycerol, and variable imidazole

Protein

Concentration: *batch specific* mg/ml

Bioactivity: See figures for details

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

WARNING
THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA
This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY
Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.

PRODUCT INFORMATION

Description

JAK2 is a non-receptor tyrosine kinase that has roles in immune signaling.^{1,2} It is composed of N-terminal FERM and SH2 domains, a regulatory JH2 pseudokinase domain, and a C-terminal JH1 kinase domain. It is widely expressed and associates with class I and class II cytokine receptors at the plasma membrane.^{3,4} Activation of these cytokine receptors activates JAK2 and induces its dimerization and kinase activity, leading to JAK2 phosphorylation of STAT transcription factors and transcription of immune-related target genes. JAK2 signaling is inhibited by the suppressor of cytokine signaling (SOCS) proteins SOCS1 and SOCS3.^{5,6} Gain-of-function mutations in JAK2 are associated with various blood disorders, including leukemias and myeloproliferative neoplasms.⁴ Cayman's JAK2 JH1 and JH2 Domains (human, recombinant; aa 532-1,132) protein can be used for enzyme activity assays and has a calculated molecular weight of 98 kDa.
