PRODUCT INFORMATION

1,2-Dioleoyl-3-linoleoyl-*rac*-glycerol

Item No. 62610

CAS Registry No.: 2190-20-7
Formal Name: 9Z,12Z-octadecadienoic acid
2,3-bis[[[(9Z)-1-oxo-9-octadecen-1-yl]
oxy]propyl ester
Synonyms: OOL, TG(18:1/18:1/18:2),
TG(18:1(9Z)/18:1(9Z)/18:2(9Z,12Z)),
TG(54:4)
MF: C₅₇H₁₀₂O₆
FW: 883.4
Purity: ≥95%
Supplied as: A solution in methyl acetate
Storage: -20°C
Stability: ≥1 year

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

1,2-Dioleoyl-3-linoleoyl-*rac*-glycerol (OOL) is supplied as a solution in methyl acetate. To change the solvent, simply evaporate the OOL under a gentle stream of nitrogen and immediately add the solvent of choice. Solvents such as ethanol and dimethyl formamide purged with an inert gas can be used. The solubility of OOL in these solvents is approximately 10 mg/ml.

OOL is sparingly soluble in aqueous buffers. For maximum solubility in aqueous buffers, the methyl acetate solution of OOL should be diluted with the aqueous buffer of choice. OOL has a solubility of 500 µg/ml in a 1:1 solution of ethanol:PBS (pH 7.2) using this method. We do not recommend storing the aqueous solution for more than one day.

Description

OOL is a triacylglycerol containing oleic acid at the *sn*-1 and *sn*-2 positions and linoleic acid at the *sn*-3 position. It is found in a variety of seed and vegetable oils, including pumpkin seed, olive, and sesame oils.¹⁻³
