Product Information

15-Lipoxygenase Standard

Catalog No. 760714

Laboratory Procedures

This vial contains a solution of soybean 15-Lipoxygenase. 15-Lipoxygenase, when stored as supplied, is stable for one year at 4°C. Transfer 10 µl of the supplied enzyme to another vial and dilute with 990 µl of diluted Lipoxygenase Inhibitor Screening Assay Buffer (10X) (Catalog No. 760710) prior to assaying with the Lipoxygenase Inhibitor Screening Assay (Catalog No. 760700). The diluted enzyme is stable for 1 hour when stored on ice. A 90 µl aliquot of the diluted enzyme per well causes a final absorbance of approximately 0.19 under the standard assay conditions described in the Lipoxygenase Inhibitor Screening Assay kit booklet.

CAUTIONS

For laboratory research use only. This reagent is not for human or veterinary use. This product has been tested and formulated to work exclusively with the Lipoxygenase Inhibitor Screening Assay kit from Cayman (Catalog No. 760700). This product may not perform as described if used with other assay reagents or protocols.
