Product Information

Palmitoyl Ethanolamide-d₅

Item No. 9000573

Formal Name:	N-(2-hydroxyethyl)-hexadecanamide-15,15,16,16,16-d ₅
Synonyms:	Palmidrol-d ₅ , PEA-15,15,16,16,16-d ₅
MF:	C ₁₈ H ₃₂ D ₅ NO ₂
FW:	304.5
Chemical Purity:	≥98%
Deuterium	
Incorporation:	≥99% deuterated forms (d ₁ -d ₅); ≤1% d ₀
Stability:	≥2 years at -20°C
Supplied as:	A solution in methyl acetate

Laboratory Procedures

Palmitoyl ethanolamide-d₅ (PEA-d₅) contains five deuterium atoms at 15, 15', 16, 16, and 16 positions. It is intended for use as an internal standard for the quantification of PEA by GC- or LC-mass spectrometry (MS). For long term storage, we suggest that PEA-d₅ be stored as supplied at -20°C. It should be stable for at least two years.

PEA-d₅ is supplied as a solution in methyl acetate. To change the solvent, simply evaporate the methyl acetate under a gentle stream of nitrogen and immediately add the solvent of choice. PEA-d₅ is soluble in organic solvents such as ethanol and dimethyl formamide (DMF), which should be purged with an inert gas. The solubility of PEA-d₅ in ethanol is approximately 5 mg/ml and approximately 2 mg/ml in DMF.

PEA-d₅ is used as an internal standard for the quantification of PEA by stable isotope dilution MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated *versus* unlabeled).

PEA is an endogenous cannabinoid (CB) found in brain, liver, and other mammalian tissues.¹ PEA has also been isolated from egg yolk, and found to have anti-anaphylactic and anti-inflammatory activity *in vitro*.² PEA is an endocannabinoid which has been shown to significantly elevate cAMP in cells expressing CB₂ receptors. However, its affinity for CB₂ receptors is relatively low, at about 10 μM. CB₁ receptors have no appreciable affinity for PEA.³

SAFETY DATA

This material should be considered hazardous until information to the contrary becomes available. Do not ingest, swallow, or inhale. Do not get in eyes, on skin, or on clothing. Wash thoroughly after handling. This information contains some, but not all, of the information required for the safe and proper use of this material. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Cayman Chemical Company makes **no warranty or guarantee** of any kind, whether written or oral, expressed or implied, including without limitation, any warranty of fitness for a particular purpose, suitability and merchantability, which extends beyond the description of the chemicals hereof. Cayman **warrants only** to the original customer that the material will **meet our specifications at the time of delivery**.

Cayman will carry out its delivery obligations with due care and skill. Thus, in no event will Cayman have **any obligation or liability**, whether in tort (including negligence) or in contract, for any direct, indirect, incidental or consequential damages, even if Cayman is informed about their possible existence.

This limitation of liability does not apply in the case of intentional acts or negligence of Cayman, its directors or its employees.

Buyer's **exclusive remedy** and Cayman's sole liability hereunder shall be limited to a **refund** of the purchase price, or at Cayman's option, the **replacement**, at no cost to Buyer, of all material that does not meet our specifications.

Said refund or replacement is conditioned on Buyer giving written notice to Cayman within thirty (30) days after arrival of the material at its destination. Failure of Buyer to give said notice within thirty (30) days shall constitute a waiver by Buyer of all claims hereunder with respect to said material.

For further details, please refer to our **Warranty and Limitation of Remedy located on our website and in our catalog**.
