PRODUCT INFORMATION

RR6

Item No. 9001411

CAS Registry No.: 1351758-37-6
Formal Name: 2R-hydroxy-3-(hydroxymethyl)-3-methyl-N-(3-oxo-4-phenylbutyl)-butanamide
MF: C₁₆H₂₃NO₄
FW: 293.4
Purity: ≥98%
Supplied as: A solid
Storage: -20°C
Stability: ≥4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

RR6 is supplied as a solid. A stock solution may be made by dissolving the RR6 in the solvent of choice, which should be purged with an inert gas. RR6 is soluble in dichloromethane and methanol.

Description

RR6 is an inhibitor of the pantetheinase vanin-1 ($IC_{50} = 0.54 \mu\text{M}$ for the recombinant human enzyme) and is a derivative of the CoA precursor D-pantothenic acid (Item No. 17288).¹ It is selective for vanin-1 over biotinidase, cathepsin B, cathepsin L, and papain (IC_{50} s = >200 μM for all). RR6 is active against *P. falciparum* ($IC_{50} = 14.5 \mu\text{M}$).² It reduces plasma levels of cholesterol and increases plasma levels of free fatty acids in fasted rats when administered in the drinking water at 3 mg/ml.¹ RR6 decreases neointima formation and macrophage infiltration in aortic allografts in a rat model of transplant vasculopathy.³
