### Laboratory Procedures

ISP-I-28 is supplied as a solid. A stock solution may be made by dissolving the ISP-I-28 in the solvent of choice, which should be purged with an inert gas. ISP-I-28 is soluble in the organic solvent ethanol at a concentration of approximately 30 mg/ml.

Further dilutions of the stock solution into aqueous buffers or isotonic saline should be made prior to performing biological experiments. Ensure that the residual amount of organic solvent is insignificant, since organic solvents may have physiological effects at low concentrations. Organic solvent-free aqueous solutions of ISP-I-28 can be prepared by directly dissolving the solid in aqueous buffers. ISP-I-28 is slightly soluble in PBS (pH 7.2). We do not recommend storing the aqueous solution for more than one day.

### Description

ISP-I-28 is an immunosuppressant.<sup>1</sup> *In vivo*, ISP-I-28 (1, 3, and 10 mg/kg) increases skin graft survival time in rats.
