Anti-Rat CD5 Monoclonal Antibody

Catalogue#	Format	Size	Concentration	Isotype Control
CL006A	Ascites	0.5ml	NA	CLCMG100
CL006AP	Purified	250µg	1.0 mg/ml	CLCMG100
CL006AP-S	Purified	50µg	1.0 mg/ml	CLCMG100
CL006AP-2	Purified	500µg	1.0 mg/ml	CLCMG100
CL006B	Biotin	100µg	0.1 mg/ml	CLCMG115
CL006B-5	Biotin	500µg	0.1 mg/ml	CLCMG115
CL006F	FITC	100µg	0.1 mg/ml	CLCMG101
CL006F-5	FITC	500µg	0.1 mg/ml	CLCMG101
CL006PE	PE	50µg	0.1 mg/ml	CLCMG104

Isotype: Mouse IgG1

DESCRIPTION:

Cedarlane's anti-rat CD5 monoclonal antibody recognizes a determinant expressed on all rat thymocytes and peripheral T lymphocytes. It has been determined that there are 15,000 antigenic sites for CL006 per cell on thymocytes and 30,000 on peripheral T cells. This antibody does not bind to B cells, macrophages, NK cells or mast cells (2). No cross-reactivity has been detected with non-lymphoid cells in intestine, thymus, spleen or lymph node (2). The antigen recognized by CL006 is a surface glycoprotein of Mr 69 kDa (2), and is most likely the homologue of the mouse Ly 1 and human CD5 antigen. The antigen has also been shown to have an important functional role in T cell activation and differentiation indicating a use for this antibody in related studies. This antibody may be employed to label cells with anti-mouse Ig conjugated to fluorescein, peroxidase or ¹²⁵I. This clone is reported to work with frozen and paraffin sections (3, 4).

PRESENTATION:

Ascites: 0.5ml, Lyophilized.

Purified: Purified IgG buffered in PBS and 0.02% NaN₃. (Purified from ascitic fluid via Protein G Chromatography). For maximum recovery of contents, spin down tube before use.

Biotin, FITC and PE: Biotin/FITC/PE conjugated IgG buffered in PBS, 0.02% NaN₃ and EIA grade BSA as a stabilizing protein to bring total protein concentration to 4-5 mg/ml.

STORAGE/STABILITY:

For all formats, store at 4°C. DO NOT FREEZE PE conjugates. For long term storage (**Ascites, Purified, Biotin, FITC**), aliquot and freeze unused portion at -20°C in volumes appropriate for single usage. Avoid freeze/thaw cycles.

e-mail: service@cedarlanelabs.com

SPECIFICATIONS:

Clone: MRC OX-19

Hybridoma Production:

Immunization: Immunogen: Rat thymocyte glycoproteins, depleted of LC-A, W3/13 antigen and Thy 1.
Donor: BALB/c spleen
Fusion Partner: P3-NSI-I-Ag4(NS1/1)

Specificity: Rat CD5

TEST RESULTS:

Tissue Distribution by Flow Cytometry Analysis:

Rat Strain: Wistar
Cell Concentration: 1×10^6 cells per test
Antibody Concentration: $0.5 \mu\text{g}/10^6$ cells

<u>Cell Source</u>	<u>Percentage of cells stained above control:</u>
Thymus	98.3
Spleen	31.7
Lymph Node	75.7

Cell Source: Thymocytes

N.B. Appropriate control samples should always be included in any labelling studies.

*** For optimal results in various applications, it is recommended that each investigator determine dilutions appropriate for individual use.**
