**Anti-Rat CD152 (CTLA-4)  
Monoclonal Antibody**

Catalogue#	Format	Size	Concentration	Isotype Control
<b>CL090AP</b>	Purified	250µg	1.0 mg/ml	CLCMG100
<b>CL090LE</b>	Low Endotoxin	500µg	1.0 mg/ml	CLCMG100
<b>CL090B/-5</b>	Biotin	100µg/500µg	0.1 mg/ml	CLCMG115
<b>CL090F/-5</b>	FITC	100µg/500µg	0.1 mg/ml	CLCMG101
<b>CL090PE/-4</b>	PE	50µg/200µg	0.1 mg/ml	CLCMG104

Isotype: Mouse IgG1

**DESCRIPTION:**

Cedarlane's anti-rat CD152 monoclonal antibody is specific for the cytotoxic T lymphocyte-associated protein 4 (CTLA-4), also called CD152. This antigen is known to be the receptor for B7 ligands (CD80 and CD86) present on antigen presenting cells. A subset of CD4 T cells expressing CD25 and CTLA-4 has been recognized as a potent suppressor cell population, counteracting autoimmunity and inflammation. These 'regulatory' T cells (Treg) which produce the anti-inflammatory cytokine interleukin-10 (IL-10) but not IL-2, are able to suppress the proliferation of costimulated CD25- negative indicator cells. The capacity of these naturally occurring regulatory T cells to suppress autoimmunity and inflammation suggests that therapies which activate and expand this subset could become extremely effective treatments for these immune-pathological disorders.

This clone has been tested in flow cytometry. In rats, the constitutive expression of CTLA-4 at the level detectable by flow cytometry is restricted to the CD25+ subset of CD4 T cells and thymocytes.

**PRESENTATION:**

**Purified:** Purified IgG buffered in PBS and 0.02% NaN<sub>3</sub>. (Purified from ascitic fluid via Protein G Chromatography). For maximum recovery of contents, spin down tube before use.

**LE:** Purified Ig buffered in PBS, no preservative, 0.2µm sterile filtered. (Purified from cell culture supernatant via Protein G Chromatography)

**Biotin, FITC and PE:** Biotin/FITC/PE conjugated IgG buffered in PBS, 0.02% NaN<sub>3</sub> and EIA grade BSA as a stabilizing protein to bring total protein concentration to 4-5 mg/ml.

**STORAGE/STABILITY:**

For all formats, store at 4°C. DO NOT FREEZE **PE** conjugates. For long term storage (**Purified, LE, Biotin and FITC**), aliquot and freeze unused portion at -20°C in volumes appropriate for single usage. Avoid freeze/thaw cycles.

**SPECIFICATIONS:**

Clone: WKH 203

Hybridoma Production:

Immunization: Immunogen: Purified rCTLA-4hlg fusion protein  
Donor: BALB/c mice spleen cells  
Fusion Partner: X63 Ag8.653 myeloma cells

Specificity: Rat CD152

**TEST RESULTS:**

Tissue Distribution by Flow Cytometry Analysis:

Rat Strain: Wistar

Cell Concentration: 1x10<sup>6</sup> cells per test

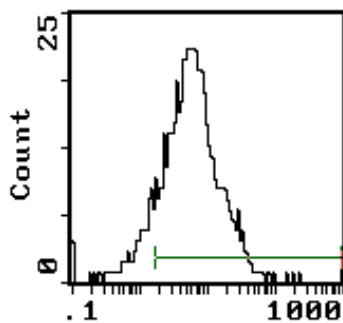

Antibody Concentration Used: 2.0 µg/10<sup>6</sup> cells

\* (T cells isolated with CL102 Cedarlane's Rat T Cell Recovery Column Kit)

Cell Source

Percentage of cells stained above control:

Lymph Node (on CD25+ cells)	73.1%
Spleen (on CD25+ cells)	87.3%
Thymus (on CD25+ cells)	76%

Cell Source: Spleen

**N.B. Appropriate control samples should always be included in any labeling studies.**
