### **DESCRIPTION:**

This monoclonal antibody binds the T-cell receptor (TCR) expressed on DO11.10 and DO11.10.24 murine T cell hybridomas, but not on any other T cell hybridomas tested.<sup>1</sup> The TCR expressed on DO11.10 recognizes an ovalbumin peptide in the context of I-A<sup>d</sup> major histocompatibility molecules.<sup>1,2</sup> The use of DO11.10 and clone KJ1-26 have proven to be instrumental in describing many of the intricate details of T cell immunity.<sup>3,4,5,6</sup> The DO11.10 T cell hybridoma is available from the laboratories of Drs. Kappler and Marrack.<sup>2,7</sup>

This antibody is suitable for use in flow cytometry.

### **PRESENTATION:**

**Purified:** Purified IgG buffered in PBS and 0.02% NaN<sub>3</sub>. (Purified from ascitic fluid via Protein G Chromatography).

**APC, Biotin, FITC, PE and TC:** Biotin/FITC/PE conjugated IgG buffered in PBS, 0.02% NaN<sub>3</sub> and EIA grade BSA as a stabilizing protein to bring total protein concentration to 4-5 mg/mL.
