Anti-Human Calcitonin gene related peptide (CGRP) **Polyclonal Antibody**

CL7792AP CL7792AP-S Lot: 189223

DESCRIPTION:

Calcitonin gene-related peptide (CGRP) is a member of the calcitonin family of peptides, which in humans exists in two forms, α -CGRP and β -CGRP. CGRP is produced in both peripheral and central neurons and is a potent peptide vasodilator and can function in the transmission of nociception. It dilates a variety of vessels including the coronary, cerebral and systemic vasculature. Its abundance in the CNS also points toward a neurotransmitter or neuromodulator role. Increased levels of CGRP have been reported in migraine and temporomandibular joint disorder patients as well as a variety of other diseases such as cardiac failure, hypertension, and sepsis. Several monoclonal antibody therapies targeting CGRP and it's receptor have been developed for patients suffering from migraine attacks.

PRESENTATION:

100 µg (CL7792AP) or 20 µg (CL7792AP-S) purified IgG (1 mg/ml) buffered in PBS and 0.02% NaN₃. (Purified from serum via Affinity Chromatography). For maximum recovery of contents, spin down tube before use.

STORAGE/STABILITY:

Store at $+ 4^{\circ}$ C. For long term storage, aliquot and freeze unused portion at -20° C in volumes appropriate for single usage. Avoid freeze/thaw cycles.

SPECIFICATION:

Immunogen: 15 amino acid synthetic peptide located within the human CGRP1 (α -CGRP) sequence.

Specificity: This antibody is specific for human Calcitonin gene related peptide (CGRP).

IgG Class: Goat IgG

Application: This antibody is suitable for use in ELISA (1:500 - 1:1K) and Immunohistochemistry with paraffin embedded sections (4 μ g/mL). This antibody has not been tested in other applications.
